

SFIS Workshop

Generate Requirement Response - CSE Overview

November 2005

Objectives for Briefing

- ▶ Describe CSE architecture support for process of “Generate Requirement Response”
- ▶ Discuss representation of Demand Unique Identifier (DUID) and its uses within the CSE Data Architecture
- ▶ Examine the role of DUID in the CSE architecture supporting “Generate Requirement Response”

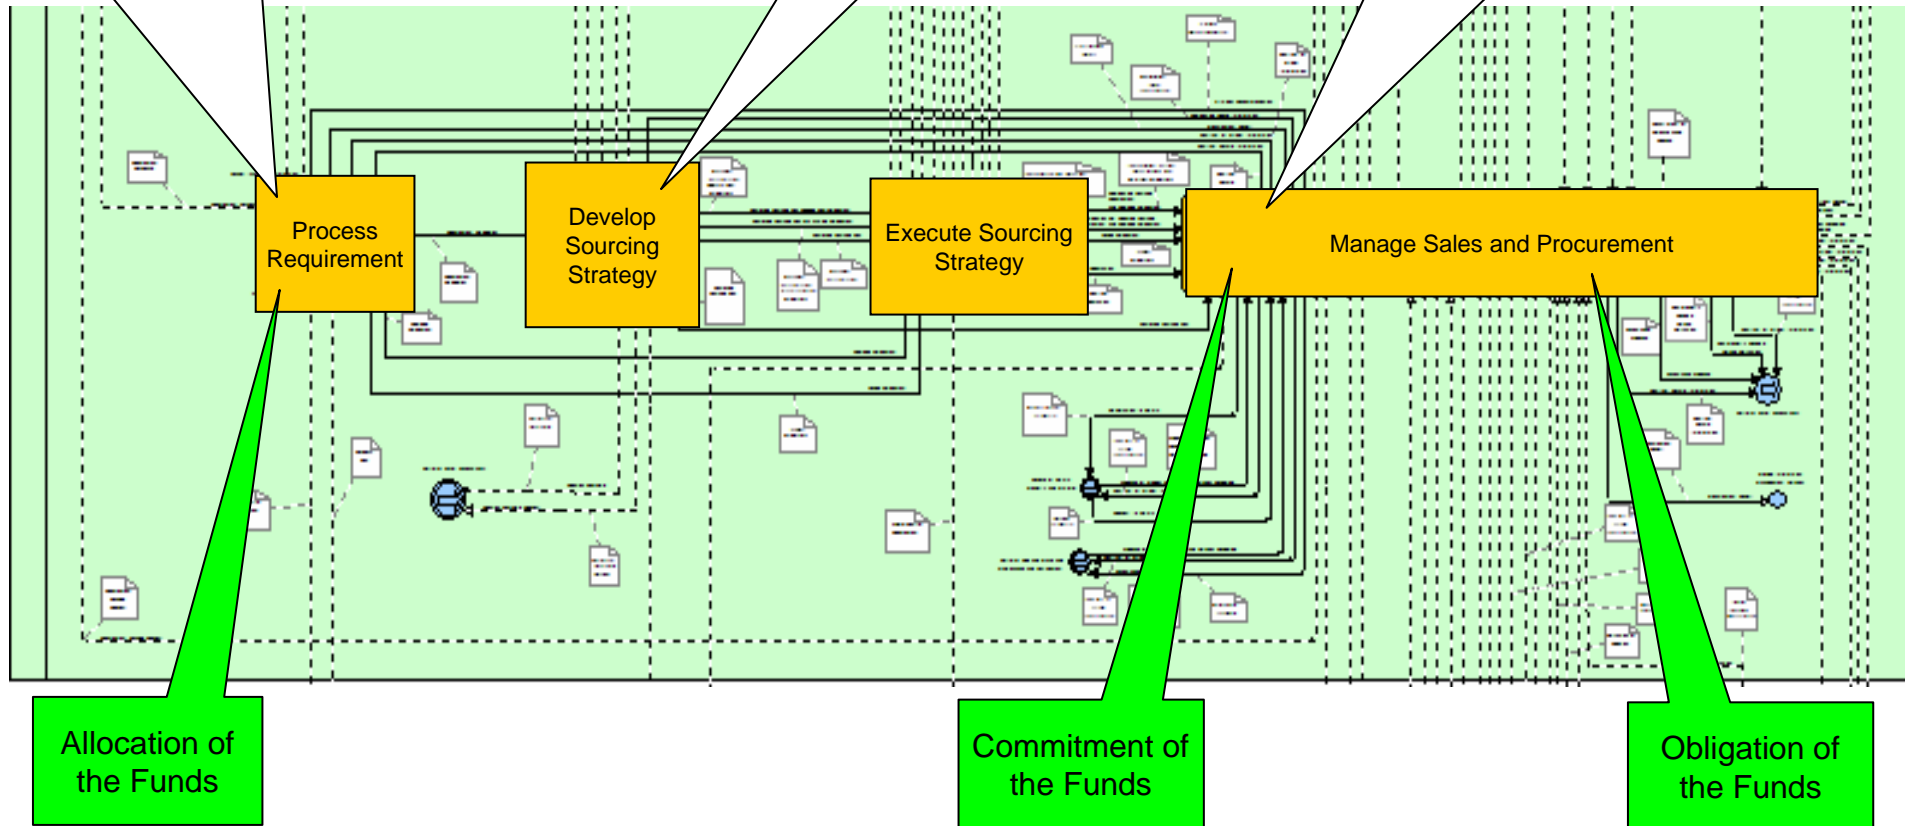

Funds: Allocate, Commit, Obligate

BR: Each approved requirement must contain as a minimum: commitment of funds; description (including a service/commodity category); quantities; and delivery information.

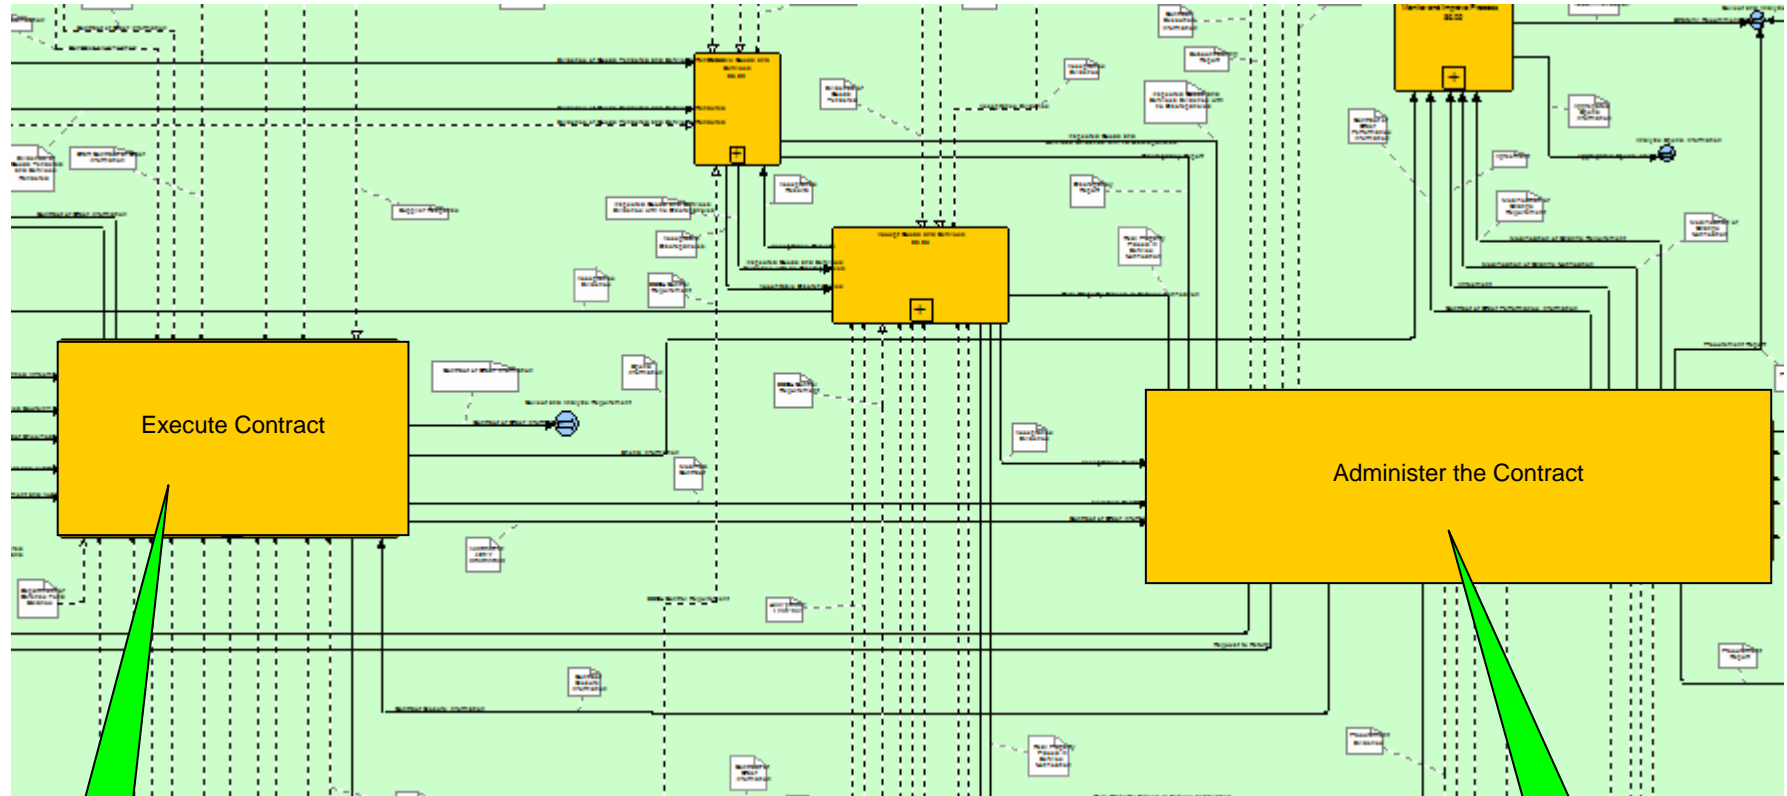

BR: Each acquisition requirement must be matched with a source of funds before creating a commitment.

BR: Prior to making an obligation, each sufficient and appropriate fund (type, year, allocated for purpose) must be committed.

Funds: Allocate, Commit, Obligate Cont.,

Develop Sourcing Strategy

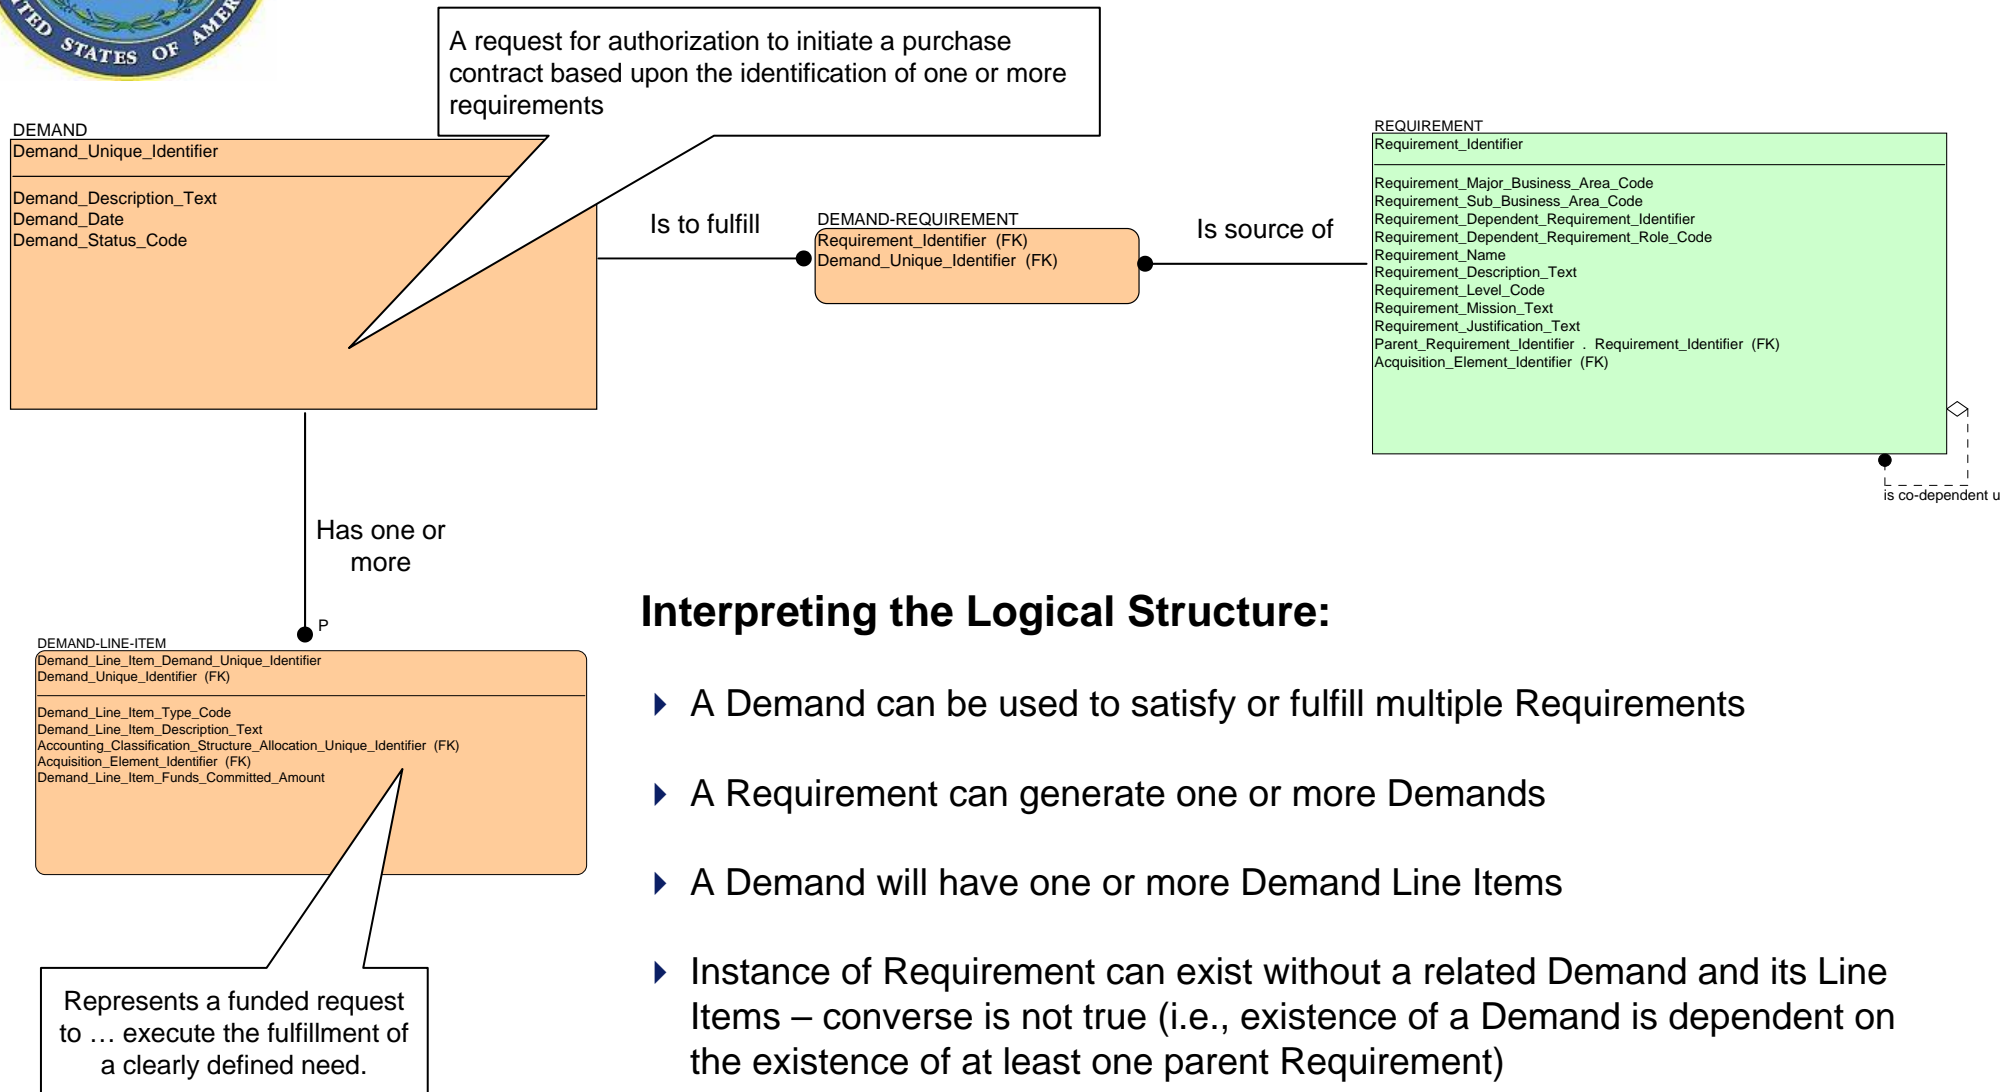

Demand Unique Identifier (DUID) Overview in CSE

- ▶ From the SFIS CONOPS, Appendix E
 - “The DUID serves as a reference throughout the process of fulfilling the demand and satisfying any associated financial transactions, e.g., commitment, obligation, disbursement.”
 - “...generate the DUID in one of two ways, multiple funding sources within the demand or multiple funding sources within the demand line item. A series of suffixes will achieve uniqueness across the life cycle of each transaction.”
- ▶ The CSE Data Architecture includes a set of constructs to define and relate the concept of “Demand” and associated “Demand Line Items” to:
 - Allocations associated with Requirements
 - Obligations associated with Contracts

Logical Data Model – Demand and Demand Line Item structures supporting IERs and Processes

DUID Business Rules Supported

Relationship to ACCOUNTING-CLASSIFICATION-STRUCTURE depicts/enforces the following rules:

- ▶ A Demand Unique Identifier (DUID) will relate to only one AUID.
- ▶ May have multiple DUIDs associated with one AUID.
- ▶ The relationship between Demand Line Item and Accounting Classification Structure (ACS) is not optional (i.e., the ACS must exist prior to the related Demand Line Items)

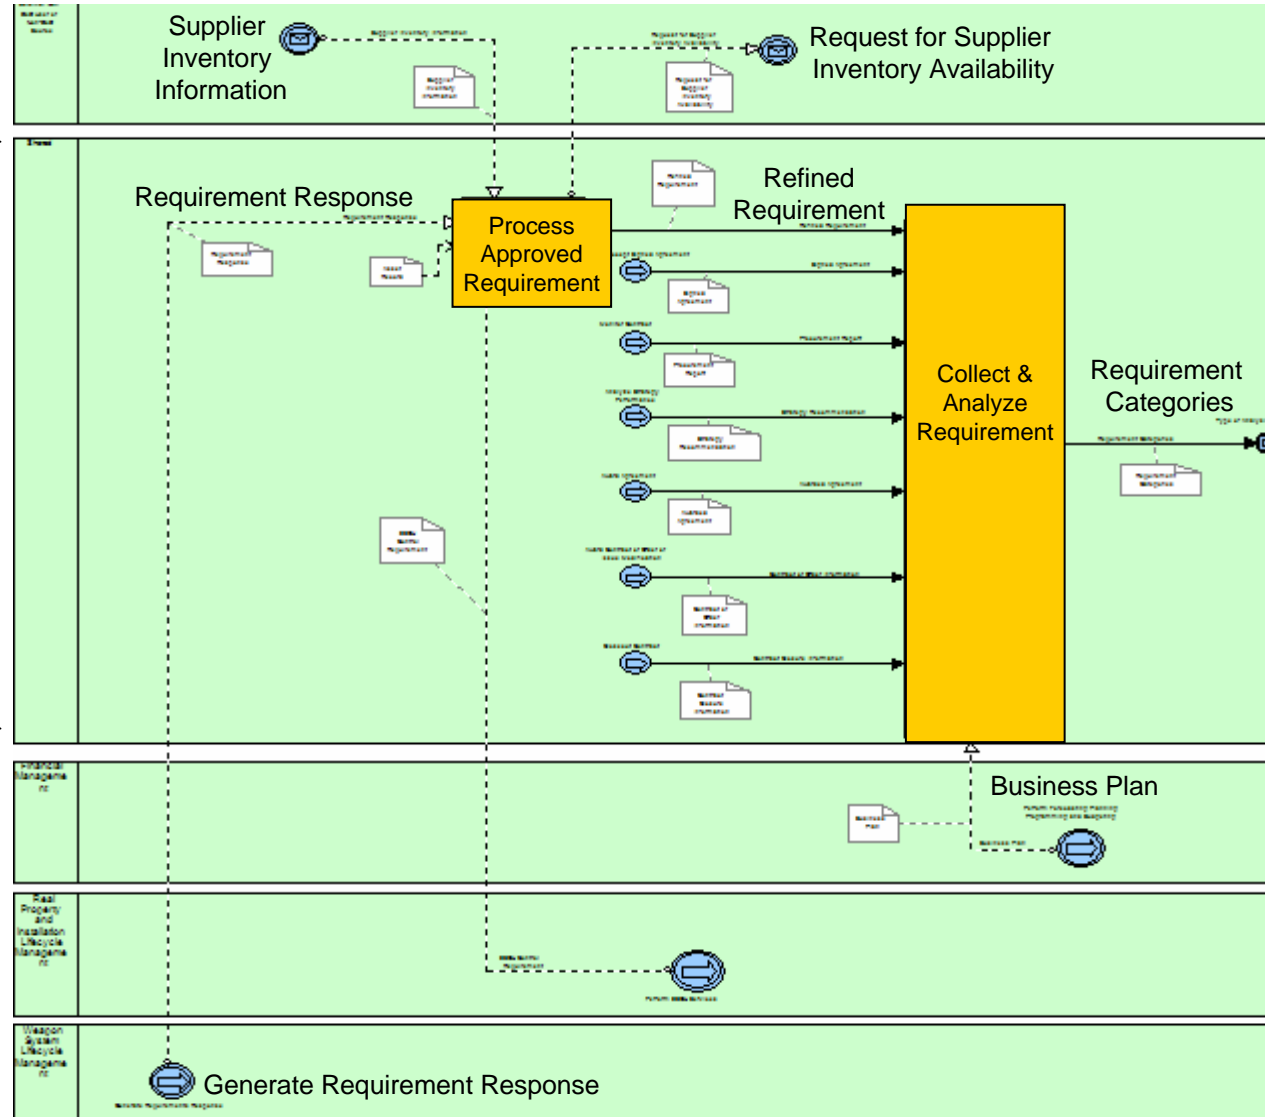

DUID doesn't play a role in CSE "Process Requirement"

DUID Business Rules

- ▶ DUID established unique numbers will allow for either of the following constructs:
 - If multiple funding sources within the demand - Demand Number Plus Suffix for each funding source.
 - If multiple funding sources within demand line items -Demand Number Plus Suffix for each demand line item and second suffix for each funding source
- ▶ Commitment accounting is required based on authority and availability of funds upon the creation of the DUID, unless otherwise authorized by OUSD (C).
- ▶ A DUID must be created when funds are committed.
- ▶ A Demand Unique Identifier (DUID) will relate to only one AUID.
- ▶ May have multiple DUIDs associated with one AUID.
- ▶ Obligation data is uniquely identified at the line item or sub-line item level and
- ▶ DUID is suffixed at sub-line item level.
- ▶ Subsequent UIDs will be associated with precedent UIDs.
